Mountain Weather Forecast

South Grampian and Southeast Highlands

Including South and East Cairngorms National Park, Aberdeenshire and Angus Hills, Ben Vrackie, Ben Lawers, Loch Tay and Ochils
Forecast valid from 06:00 on Monday 28 Dec 2020 until 23:59 on Tuesday 29 Dec 2020

Forecast Issued on Monday 28 Dec 2020 at 02:50 by Met Office Aberdeen

Confidence: High for cold conditions to dominate over the coming days. The main uncertainty relates to the extent shelter across the southern ranges on Tuesday and for any periods of stronger winds and more prolonged snow beyond mid week.

Headline for Monday 28 Dec 2020: A cold, largely dry day.

Mountain weather hazards on Monday 28 Dec 2020

Blizzards No Likelihood	**Heavy Snow** No Likelihood	**Storm force winds** No Likelihood
Gales No Likelihood	**Severe chill effect** Medium Likelihood	**Poor visibility** Low Likelihood
Thunderstorms No Likelihood	**Heavy persistent rain** No Likelihood	**Strong sunlight** No Likelihood

Forecast for Monday 28 Dec 2020

Weather: Spells of heavy snow gradually easing and clearing southwards through the early hours. Then a cold but increasingly bright start. Some sunshine likely through the day as well as some lingering hill fog. Scattered snow showers will spread from the east later in the day.

Chance of cloud free mountain/hill tops above 800m: 50% improving 80%. Areas of cloud above 400m slow to clear though morning and some may linger through the day.

Visibility: Very good in general away from hill fog. Falling to less than a kilometre in snowfall.

Met Office Aberdeen Meteorologist's View
Winds just strong enough to bring a significant chill. Be aware of conditions deteriorating in the east later in the day.

Forecast for Tuesday 29 Dec 2020
Weather: Another cold start with scattered and often heavy snow showers spreading southwards on freshening winds. A contrast in conditions across the areas with the northern ranges shrouded in cloud but occasionally brighter conditions towards the Perthshire Hills. Rain falling to glen level through daylight hours.

Maximum wind: North or NW 10-15mph.

Chance of cloud free mountain/hill tops above 800m: 60% south, 20% north. Showers often bringing cloud down to 300-500m.

Visibility: Generally poor above modest elevation away from the more sheltered south. Visibility reduced to several hundred metres in passing snow showers with a risk of whiteout conditions.

Temperature: **Glens:** Minus 1 or 2C rising to plus 2C.
At 800m: Minus 4C.
Freezing level: 400m rising 600m.
